Profile

Currently a DevOps Apprentice at Airbus Defence & Space, I will soon join a Master's program in Information Systems Security and Networks (SSIR) at the University of Toulouse. I am looking for an apprenticeship position to apply and enhance my skills in cybersecurity.

Professional Experience

Airbus Defence and Space

DevOps / DevSecOps Apprentice

Toulouse

Sept. 2024 – Present

- Development of a critical file management solution (**Java SpringBoot**, **ReactJS**).
- Implementation of **GitLab** CI/CD pipelines integrating automated tests and quality analysis.
- Implementation of Infrastructure as Code via **Ansible**.

Airbus-OneWeb

System Administrator Intern

Toulouse

April 2024 – June 2024

- Automation of software deployment on Linux fleets (**RHEL**, **Debian**) via **Ansible**.
- Hardening of production environments and management of **SELinux** security policies.
- Daily interaction in **English** with American teams.

Education

Université Paul Sabatier

BSc in Computer Science (L3)

Specialization in IT, Cloud, and Cybersecurity.

Toulouse

2025 - 2026

IUT Paul Sabatier

Bachelor of Technology (BUT)

Deployment of secure and communicating applications.

Toulouse

2022 - 2025

INSA

Preparatory Classes (Engineering)

Engineering Sciences.

Toulouse

2021 - 2022

Technical Skills

DevOps & Cloud: Ansible, Docker, Kubernetes, GitLab CI/CD, Linux (RHEL/Debian), Bash.

Development: Java Spring Boot, TypeScript, Python.

Security: Pentesting, SELinux, OWASP, Cryptography.

AI & API: Generative AI (LLM) and Model Context Protocol (MCP) on-premise.

Projects & Achievements

Offensive Security: TryHackMe (Top 3%): 157 Rooms, 22 Badges. Weekly training.

Secure Dev: Android Messaging (Java): End-to-end encryption and anonymization of exchanges.

Hardening: Personal Infra: Network architecture exposed to the Internet, segmentation, Firewall, VPN, and Routing.

Data Privacy: Encrypted Cloud Backup: Automation of encrypted backups (GPG) to a public Cloud.

Interests

Music: Piano for 10 years at the conservatory.

3D Printing: Modeling and printing of various objects.

Infrastructure: Setup and management of personal servers and network devices.

Tech: Active tech watch, Open Source software, trends, startups.
